

**Iranian Orthopaedic Association**

**Scientific Chair: Dr.SMJ.Mortazavi**

**Moderator: Dr.MH.Nabian**

**Subject: Pediatric Femoral Shaft Fractures: Contemporary Management and Challenges**

جلسه ماهانه انجمن ارتوپدی

پنجشنبه ۵ مهرماه ۱۴۰۳

ساعت ۱۰:۳۰-۸:۰۰

برنامه به صورت  
حضورى در محل  
انجمن برگزار  
میگردد.

Pediatric Femoral Shaft Fractures: Contemporary Management and Challenges		
08:00-08:08	Epidemiology and Mechanism of Injury in Pediatric Femoral Shaft Fractures Incidence and common causes (falls, road traffic accidents, etc.). Age-based variations in injury patterns. Unique biomechanical considerations.	Dr.M.komijani
08:08-08:16	Classification Systems for Pediatric Femoral Shaft Fractures Review of classification systems (Winqvist-Hansen, AO Pediatric C Importance of fracture classification in guiding treatment options	Dr.P.Tabatabaei
08:16-08:24	Non-Operative Treatment Approaches: Indications and Techniques Indications for conservative management based on age, fracture type, and stability. Techniques like Pavlik harness, spica casting, and traction.	Dr.A.Hemmatyar
08:24-08:30	Q & A	
08:30-08:38	Surgical Treatment: Flexible Intramedullary Nailing (IMN) .Indications for using flexible nails in pediatric patients - .Step-by-step technique for closed reduction with flexible nails -	Dr.MM.Ebrahimi nasab
08:38-08:46	Surgical Treatment: Rigid Intramedullary Nailing and External Fixation Indications for rigid nails in older children. External fixation for severe fractures or polytrauma cases.	Dr.S.Baghbani
08:46-08:54	Complications and Long-Term Outcomes of Pediatric Femoral Shaft Fractures Common complications: malunion, limb length discrepancies. Management of post-treatment issues.	Dr.S.Noori
08:54-09:00	Q & A	
09:00-09:15	Case presentation 1 Pediatric Femoral Shaft Fracture in a 3-Year-Old - Non-Operative vs. Surgical Management Criteria for choosing between spica casting or flexible IMN. Panelists debate based on experiences and literature.	Dr.A.Ghaznavi
09:15-09:30	Case presentation 2 Plating of the pediatric femoral shaft fracture	Dr.M.Tavakoli
09:30-09:45	Case presentation 3 Malunion and Limb Length Discrepancy Following Treatment Strategies for correction and long-term rehabilitation.	Dr.A.Maleki
09:45-10:00	Case presentation 4 Adolescent Femoral Shaft Fracture in a 14-Year-Old - IMN vs. Rigid IMN Indications for flexible vs. rigid IMN, considering skeletal maturity	Dr.M.Mehrafshan
Modrator	Dr.T.Baghdadi, Dr.MH.Nabian	
Members	Dr.A.Ghaznavi , Dr.Tavakoli , Dr.Maleki , Dr.M.Mehrafshan	
10:00-10:30	<b>Break</b>
